Cricut Infusible Ink projects. It is important to note that the graphics created with infusible pens and markers Ink requires using resistant heat Can I Use Folded Towels Instead of the Cricut EasyPress Mat? Cricut really recommends that you use the EasyPress Mat because it helps eliminate moisture and directs heat to your Infusible Ink design during the transfer process. For standard heat-transfer vinyl (HTV) projects, a towel works fine, but it just does not provide the required surface for a successful Infusible Ink transfer. Besides, the mats are really good and great for BOTH kinds of heat transfer products. What Cutting Mat Works Best for the Infusible Ink Transfer Sheets? Cricut recommends you use the GREEN StandardGrip mat to cut the transfer sheets. If you use the Infusible Ink pens and markers with your Cricut, you should use the BLUE LightGrip mat. Do I Need to Mirror My Infusible Ink Designs? Yes! You want to mirror (flip) your designs just like you would for an iron-on (HTV) design. Learn exactly how to do that here. Do I Need to Weed my Infusible Ink Designs? Yes, but you¢ÃÂÂll do it a bit differently than with iron-on vinyl. How do I weed my design after cutting Infusible Ink Transfer Sheets? To weed Infusible Ink Transfer Sheets, it¢ÃÂÂs recommended that you employ the ¢ÃÂÂcracking¢ÃÂÂ method. To do this, peel the cutting mat away from your cut design (which is what I always recommend anyway), then slightly bend and roll the cut paper until you hear a little cracking sound (which happens as the cuts separate). Don¢ÃÂÂt worry if your design lifts off the liner a bit. After you ¢ÃÂÂcrack¢ÃÂÂ your cut design, just take away the excess paper and you¢ÃÂÂll be left with just your design on the liner.Â Â You can see how I weed my design when I make a Cricut Infusible Ink layered T-shirt. How Do I Care for My Infusible Ink Projects? To take good care of your T-shirts, onesies, and totebags, machine wash them inside out with cold water and mild detergent, tumble dry low or line dry, and do not use fabric softener, dryer sheets, or bleach. You can iron, steam, and dry them! Find out how different shirts get up to the washing machine and dryer! For sub-coaters, it is possible to wash with hot water and glass cleaner — do not use steel wool, colored detergents, or wash pads. What happens if I don't use or apply Cricut's infusion according to the directions? I have a lot of those questions "what if...". So I decided to perform some experiments. You can see what works and what does not work in my Cricut Infusible Ink Tips Playtest. Do you want more help with Retardant Ink? Sign up here! If you have multiple questions, please ask in my Facebook group or email me to Love, would you like to remember this? Save the Cricut Ink Guide for your favorite Pinterest card! On board!
